

RFID ADVANTAGES

- Up to 20 times faster than manual or barcode processes
- Reads dozens of tags simultaneously
- Read ranges (inches to hundreds of feet)
- Doesn't require a line-of-sight to scan tags

ABOUT inLogic

inLogic provides RFID asset tracking solutions that help clients save time, reduce operating costs, and improve accuracy.

WHAT WE DO

inLogic is a leading provider of RFID fixed asset tracking software that enables organizations to save time, reduce operating costs, and improve asset visibility.

RFTrack SOFTWARE CAPABILITIES

- Significantly reduces the man-power required to track assets
- Automates fixed asset physical inventories
- Quickly locates missing assets
- Improves asset utilization and accountability
- Tracks the movement of assets in real-time to improve visibility

WHAT MAKES US DIFFERENT

- inLogic has over 15 years of experience implementing RFID for clients
- We specialize in fixed asset tracking solutions
- RFTrack is a mature software platform
- RFTrack features are based on years of end-user feedback
- RFTrack is designed to integrate with and complement existing systems
- Easily import/export data from other systems or spreadsheets
- RFTrack is web-based - no software to install on user's PCs
- Real-time inventory reconciliation on the handheld
- Supports handheld and fixed RFID readers
- Unlimited users - no per user software costs (On-Premise)
- Easily add custom fields and customize system terminology
- Easy to implement (ready to use out of the box)
- Scalable enterprise solution on Microsoft .NET/SQL platform
- Maintenance and Support includes all version upgrades
- On-Premise or On-Demand deployment options
