

### HOW IT WORKS

RFTrack Mobile automates the process of physically inventorying fixed assets using handheld RFID readers. In addition to improving asset visibility, it saves time, reduces costs, and improves accuracy.

### RFID ADVANTAGES

- Up to 20 times faster than manual or barcode processes
- Reads dozens of tags simultaneously
- Read ranges (inches to hundreds of feet)
- Doesn't require a line-of-sight to scan tags

### ABOUT inLogic

inLogic provides RFID asset tracking solutions that help clients save time, reduce operating costs, and improve accuracy.

## RFTRACK MOBILE

Assets can be easily reconciled for each location. As RFID tags are scanned, users see real-time feedback on found, missing, and misplaced assets. Missing and misplaced assets can be easily resolved by viewing detailed asset information and pictures, entering comments, re-assigning locations, and viewing historical inventory information. This allows the user to quickly reconcile assets on the handheld before moving on to the next location.

## FEATURES

- Automate physical inventories
- RFID and Barcode supported
- Locate missing assets
- Assign RFID Tags to assets
- Add new assets
- Proximity Locator (Geiger counter)
- Bulk transfer of asset locations, departments & owners
- Online (real-time) & Offline (disconnected) modes

## BENEFITS

- Lower cost of physical inventories by reducing labor and administration
- Improve accuracy by eliminating reliance on manual input
- Streamline operations by enabling process improvements
- Improved efficiency leads to short-term ROI
- Improve asset utilization and visibility
- Improve accountability for SOX and GASB 34
